EDUCATION

Northeastern University | Khoury College of Computer Science   Sep 2023 – May 2027
Candidate for B.S. in Cybersecurity | Minor in Law and Public Policy | Dean's List   *Boston, MA*
Relevant Courses: Discrete Structures, Theory of Computation, Algorithms and Data Structures,   **GPA: 3.70**
Foundations of Cybersecurity, Systems Security, Computer Systems, Object Oriented Design, CYB102
Certifications: ISC2 Certified in Cybersecurity (CC)

SKILLS

Languages: Java, JavaScript, TypeScript, C, Python, HTML, Tailwind/CSS, Assembly, SQL, Bash, DrRacket
Tools/Frameworks: React, NodeJS, NextJS, NestJS, AWS(RDS, Cognito), MongoDB, Supabase, Prisma
TypeORM, PostgreSQL, Microsoft Office, REST APIs, Agile
Cybersecurity Tools: Linux, BurpSuite, MetaSploit, IDA Pro, WireShark, NMap, PowerBI
Extracurricular: FirstByte (**President**), The Ortelian Society (**Vice President**),
Code4Community (**Software Developer, Jumpstart Mentor**), NEU CTF Club (**Top 3** @ SeaTF, **8th** @ BigCTF),
HackBeanPot (**Honorable Mention for Best Overall Project**), Big Brother Big Sisters of Eastern Mass (**Mentor**)

EXPERIENCE

Cybersecurity and Technology Audit Co-Op   Jul 2025 – Present
Liberty Mutual Insurance   *Boston, MA*
- Audit **17** enterprise cybersecurity policies for state, international, and third-party compliance across all **4** key SBUs
- Evaluated **4** SDLC, DevOps security controls, IAM configurations via PowerBI, Aravo, Archer; evaluated **2** findings
- Led **CI**, developed an AI agent that audits client communication lists, updated **5+** onboarding IAM procedures.

Full Stack Software Engineer   May 2025 – Present
Code4Community   *Boston, MA*
- Built NestJS/Postgres/TypeORM backend, TypeScript/React frontend, Jest endpoint tests, led **2** research spikes
- Developed org recruitment portal used by **3+** subteams, **70+** members, implemented role-based access for **3** roles
- Lead TypeScript/React workshop for **80+** underclassmen; built backend for **9-week** project-based curriculum

President   Sep 2024 – Present
FirstByte   *Boston, MA*
- Lead **5** subteams, **2** Boston youth org partners, led increase of **200%** in potential partners, **20+** new members
- Built and taught **1-hr** curricula for beginner web dev and block-based programming to **40+** high school students
- Founded full-stack web dev curriculum, presented live with demo to **30+** students at a university-wide hackathon

---

PROJECTS

Online Barber Store/Gallery - dreamstore | *React, TypeScript, NextJS, Supabase, Stripe API*   May 2025
- Full stack e-commerce platform with Stripe-integrated customer view and Supabase Auth-secured admin portal
- Implemented Supabase authentication, buckets, and tables for secure product and gallery image management
- Built persistent shopping cart with Zustand state management and real-time stock validation during checkout

Digital Road Trip Planner - throwapin.com | *TypeScript, React, Tailwind, Three.js, Supabase*   Feb 2025
- NextJS, React, Tailwind, and Three.js frontend, used geospatial data with Leaflet.js, GeoJSON, OpenStreetMaps
- Integrated Google Places API, Directions API, and OAuth to build user-authenticated POI itineraries via Supabase
- Received Honorable Mention for Best Overall Project at 36-hour Hackathon against 100+ contestants, won a mug

Cipher Encryptor | *Python*   Jan 2025
- Command-line encryption tool with Vigenère and Caesar(ROT) cipher implementation, supporting extended ASCII
- Secure input validation system with completed error handling and key range verification for attack prevention
- Integrated cryptanalysis functionality with brute-force attack capabilities for penetration testing scenarios

Mini Shell in C | *C, Linux*   Oct 2024
- Developed mock Linux shell with command execution, built-in commands (cd, help, prev, source), and arg parsing
- Implemented I/O redirection and inter-process communication using pipes for command chaining and data flow
- Built tokenization engine and process management system using fork/exec for concurrent command execution
